1000

REPORTER'S SIGNATURE: [REDACTED]

SUPERVISOR'S SIGNATURE: [REDACTED]

REF ID: A6542649 (S-3 P-1 R-2)

1. This report contains information concerning sightings of unidentified flying objects south east of Mexia (24°31'N 98°15'W) on 10 November 1958.

2. The Source, a professional medical doctor, is United States Army Corps of Engineers by calling and Highway 24 south of Mexia. Source is a native of Texas and holds a BS degree in physics in addition to his medical degree. Source was an attorney officer in the United States Army from 1938 to 1942. In 1942 he was released to the National Guard upon completing his legal education and served in the Pacific Theater until the end of the war. Source is well known in the Mexia area and his judgment is generally respected. Because of his scientific background, he is considered highly reliable.

3. This information has not been reported by any other source (S-3 P-1 R-2) in the Mexia area.

4. This report is significant in that it is true, no previous sighting which cannot be positively identified has on at least one occasion (28 November 1956) seen sights in the Mexia area. No other unidentified flying objects have been reported here.

APPROVED:

George D. Hartung

AIR INTELLIGENCE INFORMATION REPORT

REPORT NO. 40220 AIR-102

10-25-64

10-25-64

10-25-64

10-25-64 - 10-25-64 - 10-25-64

1. Description of the object.

a. Ground speed, about 1000 feet per second.

b. Object estimated elevation at 6000 feet, the base being estimated at 65-70 feet in diameter, and 13-14 feet high.

c. Bright orange color bright orange color throughout object.

d. One in number.

e. N/A

f. Object had four evenly spaced bright yellow lights along the sides with a portion of a fifth one visible (Inst. 1).

g. An exhaust trail was visible when in motion. Bright orange-yellow. Size compared to object unknown.

h. No second hand object was in sight or seen.

i. No other pertinent features observed.

2. Description of course of object.

a. Bright orange glow approaching observer, was in the background of his view and was curious so continued to watch object approaching. Stopped the day got out continued to observe.

b. Was first observed, angle of elevation estimated at 30°. from object reported angle of elevation estimated at 45°.

c. Angle of elevation at 45° when object began to depart and decreased to 30° at point of disappearance.

d. Object moved due north stopped, turned left, went 100' then continued due north (Inst. 2).

e. Object disappeared decreasing the angle of its apparent distance to about 6000 feet.

f. Object was visible while approaching observer for three minutes and 30 seconds and disappeared in three seconds. Total time until disappearance 30 minutes and three seconds.

3. Source of observations

a. Ground viewer.

b. No optical aids used.

This document contains information affecting the national defense of the United States within the meaning of the espionage laws, Title 18, U.S.C., and as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law and may be punished by death or imprisonment for life. It is the property of the United States Government and is loaned to you; it and its contents are not to be distributed outside your organization.

c. 0451Z 26 NOVEMBER 1957

d. Night.

e. Location of observation:

f. 1200Z 11 NOVEMBER

g. Identifying information of observer:

h. Name and address confidential. Age 37. Occupation: Medical Doctor.

i. Weather and wind aloft conditions at time and place of sighting:

j. Weather was cool and clear with high scattered clouds. No rain seen.

k. Few clouds. Very little breeze.

l. Surface: unknown.

6000 Feet 60° at 20K

10000 Feet 70° at 20K

16000 Feet 100° at 10K

20000 Feet 90° at 25K

30000 Feet 90° at 25K

Conditions over 30000 feet unknown.

m. 25000 feet scattered.

n. Twenty miles. - .

o. 25000 feet scattered.

p. No thunderstorms in area.

q. Any other unusual activity or conditions interpreted as abnormal otherwise, which might account for the sighting:

r. None.

s. Interception or identification action taken:

t. None.

u. Location of any air traffic in the area at time of sighting:

v. None.

11. Description of the object observed: (see section 10 for definition of terms)

- BODY - 1950 ft.
165 ft. - USAF
INTERESTING

The informant stated he was driving his car at approximately 60 mph on the highway. He was looking over the shoulder and noticed an orange glow in the south eastward direction. He continued to observe this glow and when he noticed this glow was approaching he took the emergency stop. When he got out of the car and continued to observe the direction he saw a large oval object to his right and the character of this object was like a disc. He did not see the object until two seconds before it disappeared. This time is represented by the fact that he observed the appearance of the object and it took only three seconds to pass him. In his opinion the object departed the area that he observed the object departing the area in less than one second or even less than one second longer.

12. Existence of physical evidence, sketch or drawing and photographs:

- None.
